

BA (Hons) Textile Design (Level 6)

Summer Vacation Project

The third year will be structured with two modules running throughout the first two terms. One will be a Specialist Practice module and will involve you writing your own programme of study. The other will be an External Brief module that will be a series of projects externally set and will include for example, competitions, agent briefs, exhibition opportunities, company briefs.

The summer term will be when the third Final Portfolio module will be undertaken; again this will be a self initiated brief that will end with you exhibiting at the final degree show and hopefully New Designers in London.

Part 1:

During the summer vacation you need to consider carefully what your chosen area of research will be for the Specialist Practice module. You must then write a brief outlining your proposed programme of study.

Part 2:

You must also start to record initial research, this must include primary research and contextual references that you have critically analysed and documented.

Both these tasks must be completed ready for presenting in the first week of term.

Work hard and have a great holiday!
