

FdA Creative Arts Practice

Equipment List

The College shop stocks all the basic equipment you are likely to require and is generally quite a bit cheaper than other stockists locally.

We will talk about materials in the introduction to the course. In the first term you will be using the usual things -

- Lots of paper
- Drawing books
- Basic drawing materials like pencils, ink, and charcoal
- Acrylic paints
- Brushes
- Stanley knife
- Putty rubber

You're also going to need these to complete your summer project but buy what you need as you need it.

You will find an A1 folder very useful to carry paper and work safely.

You will need an overall coat to protect your clothes in workshops

You would find a good digital camera very useful, though not essential.

As you begin to work in your own specialist area, you will need to begin to equip yourself with the particular equipment required and you will be given advice about what will be required and where it can be obtained as it becomes necessary.

I suggest you wait until you require something before you buy anything.
